2. Activate	\$141.90		\$100.00	\$90.00	\$211.80
Act+Accel =		\$407.85			\$477.75
3. Accelerate	\$265.95		\$250.00	\$230.00	\$335.85
Accom + Act +Accel =		\$467.80			\$537.70
4. All Three		\$467.80	\$400.00	\$360.00	

This is NOT intended to be a training just a quick overview for you to decide to do your due diligence

1. Assuming you purchased **All three** and are now selling your 1st sale to Tom, who also buys **All Three** you would receive \$400
On your 2nd sale to Sue at this level you would complete your cycle and follow your Business Partner in his/her business centre.
This now means you now have two members who are going to do the same – i.e. Make a sale on their left and earn a commission and a sale on their Right which closes their cycle. Whenever this happens they will fill your new Business centre either on your left in which case you earn a commission or on your right which will close your Business centre and open your next, **THE GOOD NEWS - every other time they make a sale you will earn either a commission or a new profit center**
2. Assuming you only find one person and they cycle before you find your next person, where do they go? Well, in your empty space to your right. Which means you close your business centre and open another – and if they get really active before you, they will fill your new Business centre on your Left and you will get paid – Easy **THE GOOD NEWS - every other time they make a sale you will earn either a commission or a new profit center**
3. Assuming you purchase the **Accommodate** and you are talking to someone who decides to buy **All Three** what happens then?
Well you have two options:-
 1. Upgrade before they do and earn the higher commission
 2. Earn the smaller commission and allow the money to flow up to the next qualifier

Special Note: - Whatever level you decide is the right decision, but do make sure you have joined the residual before any of your team or you may find you are in their team!! Do get back to the person who gave this to you and get your questions answered.
